

BOOTON, et al  
Appl. No. 09/936,220  
November 1, 2007

**AMENDMENTS TO THE DRAWINGS**

Proposed drawing changes are shown on the attached annotated marked up drawing and are incorporated within an attached proposed replacement sheets of drawings.

Attachment: Replacement Sheet(s)  
Annotated Sheet Showing Changes

**REMARKS/ARGUMENTS**

Reconsideration of this application in view of the above amendment is respectfully requested.

The amendment to the drawings adds explanatory text to blocks and tables in the drawings in accordance with traditional US practice.

During the Oral Hearing before the BPAI it became apparent to the undersigned that the prospects for success with this application were at that time limited because, in the Board's view, then pending claims were directed only at outgoing call processing rather than to the complete call processing system involving not only outgoing calls but also incoming calls, the processing being organized in such a way that a returned incoming call would automatically find its way to the current location of the intended recipient in the context of an organization where individual persons may move about between various workstations.

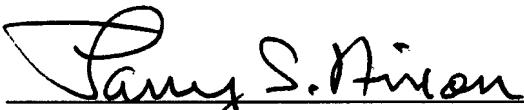

Accordingly, the above amendments now cause all pending claims to be directed to a bi-directional telephone switching method/system.

BOOTON, et al  
Appl. No. 09/936,220  
November 1, 2007

As now amended, all claims are believed to be allowable and a formal Notice to that effect is respectfully solicited.

Respectfully submitted,

**NIXON & VANDERHYE P.C.**
